LAND ACQUISITION

COMMISSION STRUCTURE

WHAT IS MRC?

MRC stands for **Most Recent Comparable** — the closest, most-recently-closed land sale that matches the subject property on location, lot size, shape, topography, flood zone, and frontage.

HOW DEALS ARE STRUCTURED

Each deal is graded by how closely the under-contract price tracks against the MRC. The smaller the differential, the stronger the deal — and the higher the commission to the agent.

MRC DIFFERENTIAL = | Contract Price – MRC | / Contract Price

DEAL CLASSES & AGENT COMMISSION

CLASS	MRC DIFFERENTIAL	AGENT COMMISSION
Class A · Great Deal	≤ 3%	**3.25%**
Class B · Good Deal	3.01 – 6%	**2.50%**
Class C · Average	6.01 – 9%	**2.00%**
Class D · Below Average	≥ 9.01%	**1.00%**

If the contract price comes in BELOW the MRC, the deal is automatically Class A.

EXAMPLES · $1,000,000 CONTRACT PRICE

$1,000,000 MRC	0% differential	Class A	**Agent earns $32,500**
$950,000 MRC	5% differential	Class B	**Agent earns $25,000**
$900,000 MRC	10% differential	Class D	**Agent earns $10,000**

The same commission structure applies to deals sourced for the internal Development Division.
